Office Action Summary	Application No. 10/806,197	Applicant(s) IWASAKI ET AL.	
	Examiner Ryan D. Walsh	Art Unit 2852	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Embodiment 1, Figures 1, 2a, 2b, 3, 4, 5, 6, 7, 8a and 8b

Embodiment 2, Figure 9

Embodiment 3, Figures 10, 11, 12, 13, 14, 15, 16, 17a, 17b, 18, 19a and 19b

The species are independent or distinct because, Embodiment 1 is directed towards a control section for controlling the feeding of recording mediums in response to a result of the temperature detected at an edge of a fusing apparatus. Embodiment 2 is directed towards a control section for controlling the feeding of recording mediums in response to a result obtained from a temperature detecting section, and extending the feeding interval of the recording mediums. Embodiment 3 is directed towards a control section for controlling the feeding of recording mediums in response to a result of the temperature detected at an edge of a fusing apparatus, and setting a paper count in response to temperature detected by the edge temperature detection section has exceeded a specific threshold temperature.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on March 31, 2003. It is noted, however, that applicant has not filed a certified copy of the 2003-095219 application as required by 35 U.S.C. 119(b).

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on March 31, 2003. It is noted, however, that applicant has not filed a certified copy of the 2003-096044 application as required by 35 U.S.C. 119(b).
